The below is an executive insight, introduction, strategic blueprint, grand scheme and summary document

2) Executive Summary and Blueprint of the Infinite levels of Understanding

The Market I Radars for Infinite Purity Understanding clearly understand that God's Source Code for existence is the same for humanity, all other beings and all the infinite ingredients in existence except that the only difference and variation is in the initial onset fixed level of consciousness when coming in to existence (but with perfect and equal balance, fairness, possibilities, opportunities, options, capabilities and potentials) only for the purpose of giving each and every humanity, other beings and all ingredients in existence to observe, witness and understand initially the infinite levels of consciousness dimension, reality, simulation, state of being, time, wisdom, purpose, experience and exposure throughout the infinite universe and at a later stage to chose their path upon their freewill; which means one specific human, being or ingredient embodies all the infinite levels of elements in existence and in the same approach it applies and works for the Infinite levels of Understanding where it consists of all the Infinite levels of Understanding existence elements and ingredients.

As opposed to the centuries old and beyond assumption, narration, fabrication, projection, teaching and preaching that there exist only a few dimensions, realities, simulations, state of being, time and consciousness of humanity, beings, existence and every other element, parameter, ingredient and package which are mostly focused on matter, material, physical, exterior, surface level, external layer, outer contexts and realizations and moreover each and every existence, humanity, being and other elements and ingredients by nature are separated, different, nonidentical, disintegrated, misaligned, non-harmonized, departed, disconnected, divided, split, classified and vary in design, foundations, formulations, workings, looks, shapes, equality, capabilities, potentials, understanding, characteristics, biology, chemistry, physics, sciences and all aspects.

The above narration and understanding has continued to be the overwhelming story still to this date for the reasons that in one hand Satan, dark forces and their agents will have a suitable environment, position and circumstance to influence, manipulate, discriminate, govern, occupy, enslave, imprison, limit, restrict, control and continue to take ultimate authority and say over humanity and other beings' biology, chemistry, mind, heart, energy, resource and spirit by creating, designing, fabricating, narrating and weaponizing endless and unlimited horizontal classifications, identifications, separations, competitions, divisions and groupings across a number of agendas like color, shape, look, profession, blood, IQ, weight, beauty, size, body, food, drink, job, profession, capability, intelligence, brand, product, economy, technology, wealth, finance, infrastructure, resource, land, water, border, service, sector, discipline, subject matter, language, clothing, shelter, culture, habit, tradition, history, luxury, education, health, race, ethnicity, city, country, village, poverty, scarcity, market, speculation, background, personality, character, politics, government,

specialization, hobby, addiction, attachment, dependency, media, sport, gender, age, asset, possession, fashion, ART, choice, talent, skill, religion, faith, interest, entertainment, game, film, music, literature, thought, feeling, perspective, experience, decision making, action, livelihood and other endless variations, separations and classifications.

And on the other hand to greatly undermine the full and infinite wonder and purpose of creation and existence in doing so to discredit the design argument and at the same time to leave no option and space for the case and cause of God by continuously painting and demonstrating the picture of unfairness, injustice, luck, bias, disorder, chance, random, inequality, scarcity, limitation, suffering, misery, cheating, theft, depression, suicide, killing, greediness, purposelessness, separation, doubt, suspicion, disinformation, denial, isolation, destruction, fear, worry, exhaustion, inferiority, dissatisfaction, difficulty, discomfort, hunger, famine, sickness, disease, conflict, struggle, poverty, discrimination, enslavement, war, disagreement, hate, anger, discomfort, death, revenge, scandal, corruption, disaster, sorrow, regret, confusion, hopelessness and other endless negative lists forgetting the fact that the existence of three states of being for every existence which are the Infinite levels of Purity Existence, the infinite levels of Neutral Existence and the Infinite levels of Impurity Existence which means they are only talking about the state of being within the scope of the Infinite levels of Impurity Existence in this case the Infinite levels of Impurity Understanding which is the version and sate of being of impurity, sin and curse under the grand scheme of God's design, workings and simulation by purposely and systematically hiding the other higher levels of state of beings which are the positives, preference and will of God filled with purity, virtues, righteous, honors, elevation, miracle, blessing, eternity, oneness, abundance, satisfaction, fulfillment, transcendence and endless mysteries of which any of the three state of beings are chosen upon the freewill of humanity and other beings.

The purity Market I Radars clearly understands the above initial foundation, source code and design for the existence and operation of the Infinite levels of Understanding abundance, existence, eternity, oneness, harmony, entanglement, convergence, synchronization and alignment; which means humanity and other beings are automatically and unconditionally offered and embody the capability and potential to enjoy the Infinite levels of Purity Understanding given the fact that they are in harmony, alignment, convergence, oneness, singularity and synchronization with the Infinite levels of Purity Understanding protocols, elements, packages and ingredients.

Contrary to the above in one hand humanity and other beings upon their freewill choice can separate and distance themselves and go to the state of being of the Infinite levels of Impurity Understanding where they end up to live negligible, insignificant, lowest, limited, conditional, volatile, cursed and imprisoning life throughout their shortest life span with the lowest, negative and Impurity Understanding dimension, consciousness, time, reality, simulation, wisdom and experience and on the other hand humanity and other beings upon their freewill

choice can remain and bond themselves and enjoy the state of being of the Infinite levels of Purity Understanding where they end up to live eternal life span and with limitless, unconditional, unshakable, virtuous, righteous, blessed, positive, the highest and Purity Understanding dimension, consciousness, time, reality, simulation, wisdom and experience. And as a last resort humanity and other beings can choose to be within the state of being of the Infinite levels of Neutral Understanding where they end up to live relatively average life span and with the average Neutral Understanding dimension, consciousness, time, reality, simulation, wisdom and experience.

The moment humanity and other beings regain the depth of clarity, chemistry, formula, understanding and workings of God's Source Code for oneness preference which is the Infinite levels of Purity Understanding out of all God's permitted Infinite levels of Understanding options, possibilities, alternatives, potentials, opportunities, dimensions, realities, simulations, state of beings and choices that exist within the source code; then the centuries long and beyond quest to activate, secure and experience the Infinite levels of Purity Understanding would come to a close after so much exhaustion, suffering, dedication, commitment, misery, pain, struggle, sin, confusion, narration, distortion, fear, frustration, investment, trial and error, loss, regret, inflammation, disease, relentless, sacrifice, ignorance, darkness, speculation, stress, contradiction, sleepless, analysis, formulation, design, execution, prediction, eagerness, expectation, argument, thought, philosophies, ideas, intervention, medicine, treatment, surgery, simulation, research and endless efforts and attempts.

But the genuine attempts and efforts has been only carried out by the few humanity as it isn't in the best interest and desire of Satan and evil forces for humanity and other beings to secure the state of being of the Infinite levels of Purity Understanding; on the other hand almost all of humanity and other beings were victims of the current and beyond centuries long purposely designed complex programs that were instrumental to make sure humanity and other beings continue to operate and function in the Infinite levels of Impurity Understanding.

The Market I Radars for the Infinite Purity Understanding clearly understand the fact that the existence of Infinite levels of Understanding contrary to the centuries and beyond long belief, conviction, norm, narration and understanding of the existence of only a few options with limited scope, out of the Infinite levels of Understanding, which all **are standardized, preached, mentored, consulted, narrated, projected, taught, understood, cultured, disseminated, organized and measured within the upper layer, surface level, exterior, material, outer part, the lowest, insignificant, negligible, negative and attaching contents, contexts, perspectives, dimensions, simulations, consciousness, time, realities, meanings, substances, purposes, causes, wisdom and related that continue to be adopted by all societies, scholars, researchers, scientists, individuals, countries, religions, cultures, traditions and beliefs in the world;** which as a result become the core

causes and reasons, for centuries and beyond, for many humanity and individuals continue to fail and become helpless to practically internalize, execute, embody, align, integrate, harmonize, converge and stay in connection with God and shift from their Impurity Understanding lives even if many tried their best to understand, follow and execute the general agreed norms, understandings, practices and guidelines and more specifically few of humanity genuinely attempted the same for decades and continue to fail again and again.

The above continues to be the case to this date; it is because of the fact that, out of endless causes, humanity and other beings are operating and functioning on the below challenges and difficulties:

- the continued existence and reality of the lack of an in-depth understanding, wisdom and clarity in the workings, consciousness and design of Infinite levels of Understanding;

- the endless levels of Understanding based horizontal identifications, classifications, competitions, discrimination, undermining, arguments, conflicts, hate, extremism, anger, distraction, distortion, plotting and the race for winning by discrediting the other rather than focusing on the vertical purpose of attaining, securing and having Purity Understanding;

- the ever rising association, occupation, attachment, addictions, dependency, priority, desire and the race for grabbing the insignificant, sinned and temporary external material, finance, money, wealth, property, asset, shiny look, greediness, possession and related lists by many humanity rather then the path towards the attainment of Purity Understanding;

- the ever increasing fall of scholars, mentors, elders, religious and faith leaders, preachers, researchers, agenda setters, media, celebrities and followers, knowingly and unknowingly, in the wrong trap of purposely and systematically designed complex programs, principles, narrations, strategies, frameworks, foundations and philosophies designed and masterminded by Satan, evil forces and their agents for making sure humanity and other beings continue to be separated from God and operate on their sinned lives and Impurity Understanding;

- the wrong messages, preaching and teachings by faith and religious leaders and scholars as if the path towards having Purity Understanding is very complex, requires sacrifice, demand long journey to attain, faced with many discomforts and obstacles, extended waiting and patience,

- the endless lists of wrong messages, norms and practices like big virtues and rewards come after death, ultimate peace and happiness is secured in another life, judgement is given in the end, life at earth is only for a temporary purpose and endless messages and narrations that continue to distract and drag humanity not to take decisive, serious, careful and practical choice and action to shift towards the attainment of Purity Understanding;

- the misinterpreted, distorted and diverted promises, knowingly and unknowingly, that humanity can gain Purity Understanding and subsequent honors if they only continue to follow the usual daily, weekly, monthly and yearly subscriptions and attachments of medicines, mentors, counselors, psychiatrists, gym, churches, mosques and related addictions accompanied by various rituals, programs, attendance, followup, learning, payments and various doings which isn't the case to this date after centuries and millennia practices;

- out of the Infinite levels of Understanding's mandatory and essential elements, ingredients and packages only a few are ingrained in almost all of the counselling, mentor, consulting, coaching, teaching, preaching and religious texts, dogma, culture and tradition; most of the teachings and preaching are focused and given to suit and comfort their followers for the sake of of keeping them and at the same time to attract new followers by deliberately sidelining and leaving the teachings of huge lists of sins and the Infinite levels of Impurity Understanding workings;

- out of the Infinite levels of channels, alignments and protocols to attain Purity Understanding only verbal and reading methods are adopted by many counselors, mentors, coaches, faiths and religions and that is why many of their followers are continuously subjected to many wrong doings, evil exercises, sinful acts and Impurity Understanding;

- the day to day addiction, attachment, dependency and association of humanity with infinite levels of Impurity Understanding that subject them to various restriction, limitation, imprisonment, enslavement, influence, manipulations, bias, unfairness, injustice, inequality, judgement, sabotage, downgrading, harm, anger, stress, inflammation, anxiety, misery, sorrow, regret, ego, pretending, scandal, corruption, denial, confrontation, unfaithfulness, impatience, purposelessness, fatigue, rigidity, ignorance, doubt, confusion, distraction, disturbance, war, weakness, fear, distrust, immorality, revenge, scarcity, rejection, meaninglessness, hopelessness, difficulty, obstacle, disrespect, disinformation, distraction, dis focus, draining and other endless gradual killing elements;

- the lack and absence of even a few individuals for centuries to showcase and demonstrate to humanity with enough clarity, simplification, formula and chemistry the grand scheme of God's workings, designs, consciousness, simulations and realities and what it takes to secure the ultimate, unconditional, unshakable, virtuous, righteous, blessed, eternal, permanent, elevated, the highest and Infinite levels of Purity Understanding

- and endless reasons, causes and justifications for the continued failure of having Purity Understanding.
